MONDAY TVENING, DEC. 15, 1902

KING ALFONZO, -Bellamy Storer, the new Ambassador to Austria-Hungary, has arrived at Paris from Madrid and will proceed to Vienna in a few days, Referring to the recent report of the ill-health of the King of Spain, Mr. Storer

"A most emphatic contradiction should be given to the boulevard slanders against the King and the Queen Mother. Only two days ago, when I saw the young King, I was struck by the fact that he had grown fully half a head since I saw him last July. He had also broadened out until he was full-chested broadened out until he was full-chested and erect, and the picture of manly health. His face reflected his happy disposition and there were no traces of his being weighted down by the cares of state. The King's tender devotion to the Queen Mother showed their beauti-ful family life and the along armostly. ful family life and the close sympathy of the members of the royal family. The report of the intended remarriage of the Queen Mother was an equally audacious slander. I am glad to say Spain is again smiling, the people are happy and the country is enjoying a fair degree of

BURNING WATER-SOAKED COKE .-Water-soaked coke has proved to be a satisfactory substitute in the household for anthracite coal in the lower Naugatuck and Housatonic valleys, Conn., The coke is retailed by the gas companies at twenty cents a bushel. The house-holder places it in water for an hour, and then puts it into his stove or furance. It takes only twenty-five bushels of coke, it is said, to produ e the same re-sults that a ton of hard coal would, and some of those who use this fuel say that it is superior to anthracite. Hard coal is quoted there at \$10 a ton, but there is none to be had, and John W. Peck, superintendent of public schools, fear-that the closing of the scho is is imminent. The Housatonic river is blocked from shore to shore, and several coal barges with Derby as their destination are held fast in the ice six miles down the river. At Seymour, a manufac-turing town to the north, with a population of five thousand, the schools are to be closed and the school coal divided among the poor.

A SUBSTITUTE FOR COAL .- A WOBderful inventioa is said to have been made by Frederick B. Fuller, of Gouvenear, N. Y., in the shape of a fuel designed to take the place of coal. The fuel is manufactured from clay and sand treated with some kind of chemical, which is the secret of the invention. It is asserted to be superior to coal as a heat generator, and is cheap. It is made by the consumer from the formula, which is sold by the inventor, and it is said it will hold fire in a grate from ten fifteen hours, and in a tight stove from fincen to thirty hours.
